

GREETINGS FROM THE RECTOR OF JYVÄSKYLÄ UNIVERSITY APPLIED SCIENCES

Welcome to Jyväskylä, and to the Lutakko campus of JAMK University of Applied Sciences!

JAMK is a nationally accredited multidisciplinary and international institute of higher education. We have built a globally strong network of some 300 partners in 50 countries. We have 590 exchange students and 510 international degree students, and hundreds of top lecturers from around the world visit JAMK University of Applied Sciences annually.

During the past 20 years, nearly 20,000 professionals in various fields have graduated from our institute: Engineers, Bachelors of Business Administration, Nurses, Bachelors of Hospitality Management, and other experts.

Just like Athenis Finlandiae, JAMK University of Applied Sciences also offers a wide array of culture. We operate in a Finnish music campus in cooperation with the Jyväskylä Educational Consortium and University of Jyväskylä. For music professionals, the music campus offers a vantage point to the pedagogics, research and development of the music in the field. The experts at and visitors to the music campus produce culture experiences to the people of Jyväskylä and lift Jyväskylä's profile as a cluster of expertise in the music field.

I wish the Athenis Finlandiae 2016 event great success!

Jussi Halttunen

Rector

JAMK University of Applied Sciences
